OpenStack Fundamentals (OS50)

Duration: 1 day

Course Overview

The objective of the class is to help all students speak intelligently about OpenStack.

By the end of this course, students will be able to describe compelling enterprise use cases of OpenStack with a high level understanding of OpenStack components and how they interrelate. Furthermore, students will gain knowledge of operating an OpenStack cluster as an end-user which equates to valuable hands-on experience for business developers and sales engineers to seamlessly transition from pre-sales to successfully closing deals.

Target Audience

This course is intended for OpenStack end-users such as project managers, business developers, and sales engineers who require cloud platform operational skills and a high level understanding of cloud computing internals, using OpenStack..

Course Objectives

- Chapter 1: Course introduction
- Chapter 2: Cloud fundamentals
- Chapter 3:OpenStack business values
- Chapter 4:OpenStack history and ecosystem
- Chapter 5:OpenStack fundamentals
- Chapter 6:OpenStack Operations through Horizon

Pre-Requisites

None
